HAND SANITIZER KIOSK 15" & 22"

Wall and **floor standing** with integrated large capacity hand sanitizer.

Hand sanitizer stations installed throughout a facility to protect employees, customers and guests are no longer just a courtesy, they are important tools to help keep people safe. Most of these stations are static devices that only deliver hand sanitizer solution and offer no extra advantage. We believe this is a missed opportunity to pass along important information. Our new Hand Sanitizer Kiosks provide a no-touch sanitizer dispenser with an integrated display and built-in media player so you can communicate to a captive audience.

Key Features

- All Metal Enclosure design for commercial use.
- Android 7.1, RK3288, 2GB RAM, 8GB storage
